

TOWN OF WENHAM
WATER DEPARTMENT

WATER BAN NOTICE

Effective October 31, 2016, the outdoor watering ban in the Town of Wenham has been lifted until further notice. The Water Commission voted to lift the outdoor water ban but would like to remind the residents that a drought warning is still in effect for our region of the state due to the abnormally dry summer. Although conservation is still necessary and encouraged, the need for outdoor water use has all but come to an end for this year. The Water Department would like to commend the residents of Wenham for complying with the water ban, dramatically reducing water consumption in September and October and for their understanding and cooperation.
